TECHNICIAN: AUTOMOTIVE ENGINE PERFORMANCE is a
comprehensive learning package designed to build automotive
skills in both classroom and shop settings. Following current
NATEF criteria, this two-manual set examines each of the major
systems affecting engine performance and driveability—including
intake and exhaust, sensors, computerized engine controls, fuel
ignition, and emissions. The Classroom Manual addresses system
theory, while a coordinating Shop Manual covers tools,
procedures, diagnostics, testing, and service. This edition
includes updates to the latest technologies to take automotive
technician training to new levels. Important Notice: Media
