Translation of Evidence into Nursing and Health Care Practice Mar 10 2022 Named a 2013 Doody's Core Title! The first text of its kind, *Translation of Evidence into Nursing and Health Care Practice* helps graduate students in Doctor of Nursing Practice (DNP) courses meet the core competency requirements, content, and knowledge of the DNP curriculum. This revolutionary guide focuses particularly on the challenges of translating evidence into practice, one of the DNP course competencies. Written by nursing faculty who are currently involved in clinical practice and who translate evidence as part of their practice activities, this textbook presents an interdisciplinary application that provides readers with content for both clinical-based and non-clinical based DNP courses. Divided into three main sections, it discusses theoretical and practical challenges to translation of evidence into practice; methods and translation techniques to employ this translation across settings; and related evaluation strategies to demonstrate improvement in practice and clinical care outcomes. Key Topics: Integration and application of knowledge into practice Leading and evaluating change Leadership strategies for translation Interdisciplinary application across settings Outcomes management for improvement of direct and indirect care Other important features include case studies, suggested activities for application of the content for learning, and an extensive list of references, current web links, and other applicable resources for enhancing graduate student learning.

Science Education Research and Practice in Asia-Pacific and Beyond Sep 16 2022 This book is based on presentations at the International Science Education Conference (ISEC) 2014. It showcases a selection of the best papers by researchers and science teachers from the Asia-Pacific region, North America and the United Kingdom. Centered on the theme of “Pushing the boundaries – Investing in our future”, they pursue new ways of helping learners appreciate the diversity and changes in science that result from a globalised world facing complex and diverse environmental and technological issues. The chapters touch on various themes in science education that explore and investigate issues of scientific literacy, societal challenges and affect, and teacher professional development. Its comprehensive themes make it a valuable textbook for graduate students of master’s and Ph.D. programs. It also appeals to pre-service and in-service teachers as a resource on innovative pedagogical practices and creative methods of professional development. With a selection that emphasises the research-practice nexus in education research, it serves as an introductory handbook for teachers to connect with the current issues facing science education.

Therapeutic Interviewing Sep 23 2020 This newly updated introductory textbook is designed to help students of psychotherapy and counseling at all levels build the foundational strategies, skills, and tools essential for engaging clients in a therapeutic interview, developing a specialist understanding of the varying formats and diverse settings in which these interviews occur. In this second edition, Michael D. Reiter interweaves a new framework, the Issue Cycle, to help students build, from start to finish, a foundational template for engaging clients regardless of therapeutic model. With every chapter being revised, as well as including a new chapter on the ethical relationship that occurs in psychotherapy, the book begins with laying down the context of therapy, such as its definitions, motivations, and ethics, before moving on to developing students skills of therapy, including conversing, reflecting, goal-setting, terminating sessions, and how to avoid being an ineffective therapist. In Parts 3 and 4, chapters cover the contexts of clients and therapy, such as working with children, families, and groups, and includes a special revised focus on multicultural interviewing and effective online counseling. Including several interactive elements, such as case scenarios and application exercises, an instructor’s manual with a sample syllabus, essay questions and more, students can uniquely see theory in action. Practical and accessible, this textbook shall be essential reading for students of psychotherapy and counseling, as well as training family therapists, social workers, and other mental health professionals who work directly with those dealing with psychological, behavioral, and emotional difficulties.

Blackstone's Civil Practice 2013 Feb 26 2021 Providing detailed commentary of unrivalled quality on the process of civil litigation, this is the only major civil work to adopt a narrative approach based on the chronology of a claim. Written by a team of expert practitioners and academics, it provides authoritative analysis on the process of civil litigation from commencement of a claim to enforcement of judgments, addressing civil procedure in the county courts, the High Court, the Court of Appeal, and the Supreme Court. The book also considers more specialist matters such as insolvency proceedings, sale of goods, and human rights, providing expert analysis on a comprehensive level. Commentary is combined with the text of the Civil Procedure Rules (CPR), Practice Directions (PD), and Pre-Action Protocols and Procedural Checklists, all fully cross-referenced to the text to ensure ease of use for the busy practitioner. As well as a detailed and user-friendly index the quick-reference guide inside the front cover provides an alternative point of access for those more familiar with the CPR. Also available, Blackstone's Civil Practice: The Commentary 2013 is a concise new book providing the unique commentary independently from the CPR, PD and other appendix materials. Electronic versions of the Procedural Checklists in Blackstone's Civil Practice 2013 are available from IRIS Laserform.

Handbook of Research on Science Education Oct 13 2019 Volume III of this landmark synthesis of research offers a comprehensive, state-of-the-art survey

highlighting new and emerging research perspectives in science education. Building on the foundations set in Volumes I and II, Volume III provides a globally minded, up-to-the-minute survey of the science education research community and represents the diversity of the field. Each chapter has been updated with new research and new content, and Volume III has been further developed to include new and expanded coverage on astronomy and space education, epistemic practices related to socioscientific issues, design-based research, interdisciplinary and STEM education, inclusive science education, and the global impact of nature of science and scientific inquiry literacy. As with the previous volumes, Volume III is organized around six themes: theory and methods of science education research; science learning; diversity and equity; science teaching; curriculum and assessment; and science teacher education. Each chapter presents an integrative review of the research on the topic it addresses, pulling together the existing research, working to understand historical trends and patterns in that body of scholarship, describing how the issue is conceptualized within the literature, how methods and theories have shaped the outcomes of the research, and where the strengths, weaknesses, and gaps are in the literature. Providing guidance to science education faculty, scholars, and graduate students, and pointing towards future directions of the field, Handbook of Research on Science Education Research, Volume III offers an essential resource to all members of the science education community.

Girls and Women in Classical Greek Religion Oct 05 2021 It has often been thought that participation in fertility rituals was women's most important religious activity in classical Greece. Matthew Dillon's wide-ranging study makes it clear that women engaged in numerous other rites and cults, and that their role in Greek religion was actually more important than that of men. Women invoked the gods' help in becoming pregnant, venerated the god of wine, worshipped new and exotic deities, used magic for both erotic and pain-relieving purposes, and far more besides. Clear and comprehensive, this volume challenges many stereotypes of Greek women and offers unexpected insights into their experience of religion. With more than fifty illustrations, and translated extracts from contemporary texts, this is an essential resource for the study of women and religion in classical Greece.

Postmodern and Poststructural Approaches to Nursing Research Jul 22 2020 "In the first three chapters, the author examines definitions of postmodern and postcultural approaches and ways in which they can be used to influence and inform us about health care. Chapters 4 and 5 look at the practical aspects of proposing and carrying out research projects using these approaches. Cheek concludes by reviewing the "intellectual journey" required in coming to grips with the meaning and application of these approaches, and she suggests ways in which the reader can continue to grow in his or her pursuit."--BOOK JACKET.

Universal Salvation in Late Antiquity Apr 18 2020 This study offers an in-depth examination of Porphyrian soteriology, or the concept of the salvation of the soul, in the thought of Porphyry of Tyre, whose significance for late antique thought is immense. Porphyry's concept of salvation is important for an understanding of those cataclysmic forces, not always theological, that helped convert the Roman Empire from paganism to Christianity. Porphyry, a disciple of Plotinus, was the last and greatest anti-Christian writer to vehemently attack the Church before the Constantinian revolution. His contribution to the pagan-Christian debate on universalism can thus shed light on the failure of paganism and the triumph of Christianity in late antiquity. In a broader historical and cultural context this study will address some of the issues central to the debate on universalism, in which Porphyry was passionately involved and which was becoming increasingly significant during the unprecedented series of economic, cultural, political, and military crises of the third century. As the author will argue, Porphyry may have failed to find one way of salvation for all humanity, he nonetheless arrived a hierarchical soteriology, something natural for a Neoplatonist, which resulted in an integrative religious and philosophical system. His system is examined in the context of other developing ideologies of universalism, during a period of unprecedented imperial crises, which were used by the emperors as an agent of political and religious unification. Christianity finally triumphed over its competitors owing to its being perceived to be the only universal salvation cult that was capable of bringing about this unification. In short, it won due to its unique universalist soteriology. By examining a rival to Christianity's concept of universal salvation, this book will be valuable to students and scholars of ancient philosophy, patristics, church history, and late antiquity.

Handbook of Oxidants and Antioxidants in Exercise Dec 27 2020 Interest in the science of exercise dates back to the time of ancient Greece. Today exercise is viewed not only as a leisurely activity but also as an effective preventive and therapeutic tool in medicine. Further biomedical studies in exercise physiology and biochemistry reports that strenuous physical exercise might cause oxidative lipid damage in various tissues. The generation of reactive oxygen species is elevated to a level that overwhelms the tissue antioxidant defense systems resulting in oxidative stress. The Handbook of Oxidants and Antioxidants in Exercise examines the different aspects of exercise-induced oxidative stress, its management, and how reactive oxygen may affect the functional capacity of various vital organs and tissues. It includes key related issues such as analytical methods, environmental factors, nutrition, aging, organ function and several pathophysiological processes. This timely publication will be of relevance to those in biomedical science and was designed to be readily understood by the general scientific audience.

Creating The "Big Mess": A Marxist History Of American Accounting Theory, C.1900-1929 Jun 20 2020 Creating the 'Big Mess' and its sequel Accounting for Crises use Marx's theory of capitalism to explain why there is no generally accepted theory of financial accounting, and explore the consequences, by studying the history of American accounting theory from c.1900 to 2007. The answer, Creating the 'Big Mess', is first that while late-19th century British accounting principles, founded on the going-concern concept, provided an objective basis for holding management accountable to shareholders for its stewardship of capital, and were accepted by the nascent American profession, they are inchoate. Second, Irving Fisher's economic theory of accounting, based on the assertion that present value is the accountants' measurement ideal, which is subjective, framed early-20th century American accounting theory, which undermined British principles, making them incoherent. In an unregulated, pro-business environment, leading theorists, particularly Henry Rand Hatfield and William A. Paton, Jr., became authorities for management discretion, creating the 'big mess' Hatfield saw in late-1920s American accounting. Accounting for Crises examines the roles of Fisher's theory in promoting the speculation leading

to the 1929 Great Crash, aggravating the Great Depression, hindering accounting regulation from the 1930s, producing the Financial Accounting Standard Board's conceptual framework, and facilitating the 2007-2008 Global Financial Crisis.
