*Bulletin de la Société botanique de France. Lettres botaniques This Cambridge history is the definitive guide to the comparative history of the Romance languages. Volume I is organized around the two key recurrent themes of persistence (structural inheritance and continuity from Latin) and innovation (structural change and loss in Romance). The crosslinguistic studies of the early developmental stages of number, case, and gender in twelve typologically different languages with eight genetic affiliations follow a functional-constructivist approach. Some issues addressed are mean size of paradigms, percentage of base forms, and productivity. One of the main findings is that the typological characteristics of the language acquired influence the process of inflectional development. This concise edition of the definitive 3-volume Dictionary of European Proverbs constitutes a fascinating collection of proverbs in 29 languages. The entries are arranged alphabetically according to the English equivalent, allowing the reader to identify common trends easily and quickly. \* All proverbs listed in original language \* 29 European languages featured \* Includes all proverbs in current use \* Thoroughly checked by language specialists to ensure accuracy. The Concise Dictionary of European Proverbs is based on over 40 years in-depth research by the compiler. It is an essential reference source for linguists, ethnologists and folklorists, and of interest to anyone wanting to know about the origins, development and current usage of the proverb. Emanuel Strauss is a world-renowned expert on proverbs. The Oxford International Student Atlas uses the latest technology to create an accurate and up-to-date atlas, ideal for use around the world.\* Comprehensive coverage of the countries and oceans of the world, together with an eight-page world statistical section\* Clear and colourful continental thematic maps illustrating a variety of subjects\* New maps on motivating topics such as cyberspace, globalisation, international alliances, and the world's most exciting holiday destinations make the atlas an ideal resource for young geographers\* Easy-to-use features include a multi-access contents page, a two-colour index of place names, and flags of the world at a usable size Includes section, "Recent book acquisitions" (varies: Recent United States publications) formerly published separately by the U.S. Army Medical Library. CRC Handbook of Phytochemical Constituents of GRAS Herbs and Other Economic Plants is a unique catalog that includes more than 15,000 phytochemical constituents from over 1,000 higher plant species. This volume covers all of the generally-recognized-as-safe (GRAS) herbs and at least 250 important food and medicinal plants. Each entry features the scientific name, one or more common names, a listing of phytochemical constituents, a single*

*datum or range of quantitative data (wet-weight to dry-weight in parts per million), two-letter abbreviation identifying the plant part, and three-letter abbreviation(s) indicating the source(s) of the data. The extraordinary amount of data compiled into an easy-to-use tabular format makes the CRC Handbook of Phytochemical Constituents of GRAS Herbs and Other Economic Plants a volume useful to all pharmacologists, toxicologists, nutritionists, pharmacognicists, and food scientists. Fungi of Australia Volume 2B: Catalogue and Bibliography of Australian Fungi 2 is an essential reference for taxonomists working on Australian fungi, and anyone who wishes to use up-to-date names of Australian fungi. Together with its companion volume, Fungi of Australia Volume 2A, it lists all the names applied to Australian macrofungi and provides the up-to-date accepted name for each species, along with a comprehensive listing of relevant literature. Volume 2B covers larger fungi in the Basidiomycota, along with the larger Myxomycota. Groups dealt with in this volume include bracket fungi, slime moulds, puffballs, earthballs, earthstars, stinkhorns, birds nest fungi, coral fungi, jelly fungi, polypores, and stereoid, corticioid and thelephoroid fungi. This important work includes entries for more than 1,700 accepted names. For each name the catalogue lists place and date of publication, taxonomic synonyms, cross references to misidentifications and a comprehensive list of all works in which the name has been used in an Australian context. The extensive bibliography contains over 1,800 entries and includes not only taxonomic publications relevant to species described from Australia, but also publications on fungi in relation to forestry, agriculture, ecology, medicine, chemistry and general biology. Metals in the earth's crust are very unevenly distributed and, traditionally, a small number of ore deposits, districts or countries have dominated the world supply and have influenced commodity prices. The importance of exceptionally large, or rich, deposits has greatly increased in the age of globalization when a small number of international corporations dominate the metals market, based on few very large ore deposits, practically anywhere in the world. Search for giant orebodies thus drives the exploration industry: not only the in-house teams of large internationals, but also hundreds of junior companies hoping to sell their significant discoveries to the "big boys". Geological characteristics of giant metallic deposits and their setting and the politico-economic constraints of access to and exploitation in prospective areas have been a "hot topic" in the past fifteen years, but the knowledge generated and published has been one-sided, scattered and fragmented. This is the first comprehensive book on the subject that provides body of solid facts rather than rapidly changing theories, written by author of the Empirical Metallogeny book series and founder of the Data Metallogenica visual knowledge system on mineral deposits of the world, who has had an almost 40 years long international academic and industrial experience. The book will provide abundant material for comparative research in metallogeny, practical information for the explorationists as to where to look for the "elephants", and some inspiration for commodity investors. Vol. 7, 1912 contains as a supplement the Resolutions of the VIIth delegates' meeting of the International Association for labour legislation.*
