BLACK+DECKER's latest edition of the best-selling home-improvement book in North America for more than a decade is completely updated to conform to 2017-2020 national electrical codes. For more than ten years, BLACK+DECKER The Complete Guide to Wiring has been the best-selling home wiring manual in

North America. Now with more than two million copies in print, this is the home reference book more DIYers choose than any other for many reasons. As the most current wiring book on the market, you can be confident that your projects will meet national wiring codes. You'll also spend more time on your project and less time scratching your head thanks to more than 800 clear color photos and over 40 diagrams that show you exactly what you need to know about home electrical service; all the most common circuits, all the most-needed techniques, all the most essential tools and materials. The information in this book has been created and reviewed by professional electricians under the watchful eye of the experts at BLACK+DECKER. You can find plenty of articles and videos about wiring online or in other publications, but only The Complete Guide to Wiring has passed the rigorous test to make it part of The Best DIY Series from the Brand You Trust. [Ahora también disponible en español: <https://amzn.to/39Sr9xm>] The use of microinverters (specifically Enphase Energy IQ Series) practically makes a solar panel electrical system plug-and-play, leaving challenges to mechanical design, permitting, sourcing components (mostly from RES Supply - <http://tinyurl.com/y7h2559k>), and installation. This practical step-by-step guide helps you build the type of system that will most universally work on the majority of North American homes. If you do your own home repairs, you already possess many of the skills needed to build a solar power system. Any remaining skills and basic knowledge about solar can be learned, which is the subject of this guide. This guide is best viewed as an eBook because it includes many hyperlinks to view offline documents, installation guides, videos, and even component pricing. Hyperlinks may not work in certain versions of Kindle Reader, so "tinyurl" links to external websites and videos are also provided. AUTHOR'S BIO René Voss lives in San Anselmo, CA, where he practices Natural Resources Law for non-profits and serves on the Town of San Anselmo's Open Space Committee. He is a past member of the Sierra Club Board of Directors (1999-2001) and an avid outdoorsman. In 1986, he received his undergraduate degree in Electrical Engineering and much later, in 2008, graduated from Concord Law School and was

admitted to practice law in California. He is a renewable energy advocate, environmental activist, and electric vehicle enthusiast. He designed, sourced, and built his first photovoltaic system in the spring of 2018, which is the subject of this guide, and he acquired his first electric vehicle in the same year. His hope is that this guide will make a small contribution toward helping accelerate our world's transition from fossil fuel consumption towards a renewable and sustainable future.
