With a distinctive focus on social and cultural diversity, Psychosocial Resilience and Risk in the Perinatal Period considers a wide range of personal circumstances and social groups, including women's experiences of traumatic birth, domestic and family violence, drug and alcohol use and mothering by indigenous, same-sex and disabled women. Throughout, case studies and service user experiences are used to illuminate the issues and illustrate exemplary care practice. International in scope, this book is particularly strong on the implications for care practices and health service delivery within Western models of maternity care.
