[The Executive MBA in Information Security](#) Jul 12 2022 According to the Brookings Institute, an organization's information and other intangible assets account for over 80 percent of its market value. As the primary sponsors and implementers of information security programs, it is essential for those in key leadership positions to possess a solid understanding of the constantly evolving fundamental concepts of information security management. Developing this knowledge and keeping it current however, requires the time and energy that busy executives like you simply don't have. Supplying a complete overview of key concepts, *The Executive MBA in Information Security* provides the tools needed to ensure your organization has an effective and up-to-date information security management program in place. This one-stop resource provides a ready-to-use security framework you can use to develop workable programs and includes proven tips for avoiding common pitfalls—so you can get it right the first time. Allowing for quick and easy reference, this time-saving manual provides those in key leadership positions with a lucid understanding of: The difference between information security and IT security Corporate governance and how it relates to information security Steps and processes involved in hiring the right information security staff The different functional areas related to information security Roles and responsibilities of the chief information security officer (CISO) Presenting difficult

concepts in a straightforward manner, this concise guide allows you to get up to speed, quickly and easily, on what it takes to develop a rock-solid information security management program that is as flexible as it is secure.

*Information Retrieval Technology* Dec 13 2019 The Asia Information Retrieval Societies Conference (AIRS) 2010 was the sixth conference in the AIRS series, aiming to bring together international researchers and developers to exchange new ideas and the latest results in information retrieval. The scope of the conference encompassed the theory and practice of all aspects of information retrieval in text, audio, image, video, and multimedia data. AIRS 2010 continued the conference series that grew from the Information Retrieval with Asian Languages (IRAL) workshop series, started in 1996. It has become a mature venue for information retrieval work, finding support from the ACM Special Interest Group on Information Retrieval (SIGIR); the Association for Computational Linguistics and Chinese Language Processing (ACLCLP); ROCLING; and the Information Processing Society of Japan, Special Interest Group on Information Fundamentals and Access Technologies (IPSJSIG-IFAT). This year saw a sharp rise in the number of submissions over the previous year. A total of 120 papers were submitted, representing work by academics and practitioners not only from Asia, but also from Australia, Europe, North America, etc. The high quality of the work made it difficult for the dedicated program committee to decide which papers to feature at the conference. Through a double-blind reviewing process, 26 submissions (21%) were accepted as full oral papers and 31 (25%) were accepted as short posters. The success of this conference was only possible with the support of all of the authors who submitted papers for review, the program committee members who constructively assessed the submissions, and the registered conference delegates. We thank them for their support of this conference, and for their long-term support of this Asian-centric venue for IR research and development.

Critical Infrastructure Protection IV Jan 26 2021 The information infrastructure – comprising computers, embedded devices, networks and software systems – is vital to operations in every sector: information technology, telecommunications, energy, banking and finance, transportation systems, chemicals, agriculture and food, defense industrial base, public health and health care, national monuments and icons, drinking water and water treatment systems, commercial facilities, dams, emergency services, commercial nuclear reactors, materials and waste, postal and shipping, and government facilities. Global business and industry, governments, indeed society itself, cannot function if major components of the critical information infrastructure are degraded, disabled or destroyed. This book, *Critical Infrastructure Protection IV*, is the fourth volume in the annual series produced by IFIP Working Group 11.10 on Critical Infrastructure Protection, an active international community of scientists, engineers, practitioners and policy makers dedicated to advancing research, development and implementation efforts related to critical infrastructure protection. The book presents original research results and innovative applications in the area of infrastructure protection. Also, it highlights the importance of weaving

s- ence, technology and policy in crafting sophisticated, yet practical, solutions that will help secure information, computer and network assets in the various critical infrastructure sectors. This volume contains seventeen edited papers from the Fourth Annual IFIP Working Group 11.10 International Conference on Critical Infrastructure Protection, held at the National Defense University, Washington, DC, March 15– 17, 2010. The papers were refereed by members of IFIP Working Group 11.10 and other internationally-recognized experts in critical infrastructure protection.

Confronting the Internet's Dark Side Jul 20 2020 Terrorism, cyberbullying, child pornography, hate speech, cybercrime: along with unprecedented advancements in productivity and engagement, the Internet has ushered in a space for violent, hateful, and antisocial behavior. How do we, as individuals and as a society, protect against dangerous expressions online? Confronting

the Internet's Dark Side is the first book on social responsibility on the Internet. It aims to strike a balance between the free speech principle and the responsibilities of the individual, corporation, state, and the international community. This book brings a global perspective to the analysis of some of the most troubling uses of the Internet. It urges net users, ISPs, and liberal democracies to weigh freedom and security, finding the golden mean between unlimited license and moral responsibility. This judgment is necessary to uphold the very liberal democratic values that gave rise to the Internet and that are threatened by an unbridled use of technology.

The Cases That Haunt Us Mar 28 2021 Certain criminal cases have a life of their own. Despite the passage of years they continue their hold on the public imagination, either because of the personalities involved, the depravity of the crime, doubts over whether justice was done, or the tantalizing fact that no one was ever caught... Now John Douglas, the foremost investigative analyst and criminal profiler of our time, turns his attention to eight of the greatest mysteries in the history of crime, including those of Jack the Ripper, The Boston Strangler and JonBenet Ramsey. Taking a fresh look at the established facts, Douglas and Olshaker dismantle the conventional wisdom regarding these most notorious of crimes and rebuild them - with astonishing results.

**Jack the Ripper** Mar 08 2022 Youve never read a Ripper book like this. Christian was born in 1852. He carried out a sexual attack on a local girl and so fled to London to avoid being lynched. He and best friend Jimmy became trainee surgeons with a nefarious organization (The Firm). Both men fell in love with the same woman. Christian later illegally married her and further on became a whoremaster. In 1888, after he found out his wife had had a long sexual affair (and a child) with his best friend, his drug use and rage led him to release his wrath upon the prostitutes he formerly protected. Lauretta his wife kept a diary writing about him realizing she was married to Jack the Ripper. After he brutally murdered numerous women usually for a reason as it was not random, he realized there was one loose end: Jimmys son. Thus, members of The Firm were hired to murder him secretly and dispose of the body. In 1913, the Ripper died after suffering via a STD. After his death, his family found a stash of money in his favourite armchair. His family lived on without him, and Lauretta (the hero) didnt pass over until 1934.

With this book as a guide they will be able to choose the right hardware (or recycle existing hardware) and then install all the necessary software.

*Sexual Murder* Oct 11 2019 *Sexual Murder: Catathymic and Compulsive Homicides* is the culmination of the author's 45 years of experience with, and studying, sexually motivated homicide. Sexual murders are generally of two types — catathymic and compulsive. Catathymic homicides are caused by a breakthrough of underlying sexual conflicts. They can be unplanned, explosive (acute) attacks or planned murders stemming from a chronic obsession with, or disturbed attachment to, the victim. In compulsive homicides, a fusion of sex and aggression results in a powerful internal drive which pushes the offender to seek out victims to kill — and the killing itself is sexually gratifying. These murders also may be planned or unplanned. In compulsive homicides that are unplanned, the urge breaks through and disrupts the offender's controls when a victim of opportunity crosses his path. The compulsive offender who plans his crimes often eludes law enforcement, and as a result he can have multiple (serial) victims over extended periods of time. Both forms of sexual murder — the catathymic and the compulsive — are presented in this volume from a clinical-descriptive perspective encompassing case studies with analysis. Recent advances in empirical research in sexual murder—including findings from the joint research project between John Jay College of Criminal Justice and the FBI Behavioral Analysis Unit in Quantico—has published many important studies. These include such topics as necrophilia, foreign object insertions in sexual homicide, ritual and signature and temporal patterns in serial sexual homicide, mass murder, crime scene staging in homicide, and undoing (symbolic reversal) at homicide scenes. All such research will be included and incorporate into this fully updated Second Edition, including approximately fifty new clinical case studies.

Advances in Computers Jun 30 2021 *Advances in Computers*, the latest volume in the series published since 1960, presents detailed coverage of innovations in computer hardware, software, theory, design, and applications. In addition, it provides contributors with a medium in which they can explore their subjects in greater depth and breadth than journal articles usually allow. As a result, many articles have become standard references that continue to be of significant, lasting value in this rapidly expanding field. Provides in-depth surveys and tutorials on new computer

technology Presents well-known authors and researchers in the field Contains extensive bibliographies with most chapters Includes volumes that are devoted to single themes or subfields of computer science

**The Stalking Jack the Ripper Collection** Jan 14 2020 Devour the complete #1 New York Times bestselling Stalking Jack the Ripper series: Stalking Jack the Ripper, Hunting Prince Dracula, Escaping from Houdini, Capturing the Devil, and a free novella are included in this thrilling new collection! Between social teas and silk dress fittings, Audrey Rose Wadsworth leads a secret life studying corpses in the gruesome practice of forensic medicine. A string of ghastly corpses drags Audrey into the investigation of a serial murderer as she searches for the identity of Jack the Ripper. This is only the beginning of Audrey's life-shattering journey. Soon, she's drawn deeper into the captivatingly gruesome world of bizarre murders. As Audrey finds herself in the castle of Dracula himself, and then face-to-face with the one and only Houdini, she discovers that love and death go hand in hand, and there's something irresistible about the charming Thomas Cresswell who accompanies her. Shocking, blood-soaked discoveries will take Audrey and Thomas across the seas from London to America, where they find themselves dangerously lost in the infamous Murder Hotel. Will Audrey Rose and Thomas see their last mystery to the end-together and in love-or will their fortunes finally run out when their most depraved adversary makes one final, devastating kill?
