Economic Fundamentals of Power Plant Performance Sep 02 2021 The book analyzes the efficiency differences among generators, plants and business units by using different performance measurement methods and a comprehensive sensitivity analysis.

The Inflation Myth and the Wonderful World of Deflation Jul 20 2020 What if everything you've learned about inflation is wrong? The Inflation Myth and the Wonderful World of Deflation illustrates our rapidly changing world where constant technological innovation leads to cheaper and better products. These changes are no longer reflected in the ways we measure inflation. Renowned investor and author Mark Mobius persuasively argues that what we believe to know about inflation today does not reflect the reality any longer. It is a myth, a legend, a fable, and, yes, a falsehood for a number of reasons. The Inflation Myth and the Wonderful World of Deflation tackles a number of fascinating topics, including: The political nature of inflation measurement where governments manipulate and exploit inflation numbers to fit their economic programs The extreme difficulty involved in gathering accurate data to measure inflation and the resulting inaccuracy of those measures The error of using currencies to measure inflation when those currencies are continually being debased by the governments who issue them Finally, and most importantly, the advances in technology and automation which are leading to continuously falling costs for goods and services Perfect for anyone with even a passing interest in macroeconomic phenomena or government policies, which are

significantly impacting people's everyday lives around the world, *The Inflation Myth and the Wonderful World of Deflation* provides a remarkably compelling and provocative view of stunning originality.

How to Read Texts Aug 01 2021 Now in its second edition, *How to Read Texts* introduces students to key critical approaches to literary texts and offers a practical introduction for students developing their own critical and close-reading skills. Written in a lively, jargon-free style, it explains critical concepts, approaches and ideas including: - Debates around critical theory - The role of history and context - The links between creativity and criticism - The relationship between author, reader and text. The new edition now includes guidance on analysing a range of multi-media texts, including film and online media as well as the purely literary. In addition to new practical examples, readings, exercises and 'checkpoints' that help students to build confidence in their own critical readings of both primary and secondary texts, the book now also offers guidance on writing fully-formed critical essays and tips for independent research. Comprehensively updated and revised throughout, *How to Read Texts* is an indispensable guide for students making the transition to university study.

Health Physics Dec 25 2020 The book bridges the gap between existing health physics textbooks and reference material needed by a practicing health physicist as the 21st century progresses. This material necessarily encompasses emerging radiation-generating technologies, advances in existing technology, and applications of existing technology to new areas. The book is written for advanced undergraduate and graduate science and engineering courses. It is also be a useful reference for scientists and engineers.

Making Connections Feb 24 2021 This title introduces first-time readers of academic text to basic reading strategies such as finding paragraph topics, finding supporting details and learning to read quickly. It features a variety of high interest topics including national borders, names, food, sleep, natural disasters, and music.

China's WTO Accession Reassessed Nov 11 2019 China's accession to the World Trade Organisation in 2001 was a highly significant event both for China and for the wider world. This book argues that, although at the time some people doubted the likely benefits, China's WTO accession has been highly successful. It discusses how China has abided by its commitment to WTO terms and how WTO membership has contributed to China's reform and opening up; explores how vastly increased co-operative exchange with many countries around the world has been mutually beneficial in a range of fields including trade, science and culture; and shows how China's WTO membership has been a great stimulus both for China's economy and the world economy. The book considers the subject from a number of perspectives, and draws out lessons for future reform and development for China, and for China's relations with the rest of the world, emphasising the need to maintain a win-win approach.

Materials Ageing in Light-Water Reactors Nov 23 2020 This book is an extensive and detailed guide to the subject of materials ageing in light-water nuclear reactors. Proper management of materials degradation is essential for the safe, reliable, and economic operation of nuclear power plants across the globe. This handbook features a stunning and thorough observational treatment of the key materials degradational phenomena in light-water reactors, capturing the results of some typical destructive examinations that have been carried out to understand and furthermore mitigate these failures. It provides a comprehensive collection of unique photographs, detailed schematics, concise analyses, as well as precise measurements and expert recommendations. It is organized in such a manner that engineers and scientists can use the observations presented to not only arrive at their own conclusions but also subsequently improve their knowledge of specific materials ageing issues. This handbook is supported by the Materials Ageing Institute (MAI) and É lectricit é de France (EDF) and is an extensive update to the previous edition, featuring up-to-minute information to reflect the state of the art as of 2020. Since its founding in 2008, the MAI has succeeded in expanding its membership and today represents two-thirds of the world's installed nuclear power capacity, benefiting from nearly 5,000 years of combined experience in reactor operation. The vast archive of past observational data and world-leading expert recommendations presented in this handbook leverage the unique expertise of the MAI in studying the key degradation phenomena of materials to ensure the secure and sustainable operation of carbon-free electricity production. It is a must-have on the desks of any engineers or researchers involved in ageing management for light-water reactors.

Innovative Strategies for Accelerated Human Resources Development in South Asia Oct 03 2021 Information and communication technology (ICT) has the potential to revolutionize education equity, quality, and efficiency. South Asia's governments have recognized this potential and invested in ICT-focused education initiatives and projects. While these efforts

helped to introduce ICT-enabled teaching and learning practices, they may not be sufficient for widespread sustainable adoption within their countries. The stage of implementation and impact of investments also vary significantly from country to country in South Asia. This paper examines the existing state and gaps of ICT in education of three South Asian countries---Bangladesh, Nepal, and Sri Lanka---and suggests strategies to address these gaps.

The Status of US Fisheries 1997-2013 Apr 16 2020 This book is a collection of annual reports on the status of US Fisheries to Congress for the period of 1997-2013 written by NOAA Fisheries (<http://www.nmfs.noaa.gov>).

The Cost of Corrosion in China May 10 2022 This book comprehensively covers corrosion and corrosion protection in China in the areas including infrastructure, transportation, energy, water environment, as well as manufacturing and public utilities. Furthermore, it presents a major consulting project of Chinese Academy of Engineering, which was the largest corrosion investigation project in Chinese history, including the corresponding methods, processes and corrosion protection strategies, and provides valuable information for numerous industries. Sharing essential insights into corrosion prediction and decision-making, this book will help to decrease costs and extend the service life of equipment and facilities; accordingly, it will benefit scientists and engineers working on corrosion research and protection, as well as economists and government employees.

Highway of Heroes Jul 12 2022 Canadians line the overpasses of the Highway of Heroes to show their support, grief, and pride in our fallen champions. The first four Canadian soldiers killed in Afghanistan were repatriated at Canada's largest military base in 2002. The fallen soldiers were driven down the 172-kilometre stretch of highway between Trenton and Toronto, and pedestrians lined the overpasses, hoping to make a connection with the grieving families. The support these people show isn't political; it's not a movement for or against Canadian soldiers in Afghanistan. It's always been a grassroots movement about showing respect for our fallen champions. People young and old, emergency services workers, Canadian Legion members, military personnel, friends of the fallen, and family of fallen soldiers stand atop each bridge along the highway in the blistering heat or bone-chilling cold. After five years of this display of patriotism, the Highway of Heroes was officially named in the summer of 2007 and has been a gleaming example of a nation's grief and its pride.

China - Russia, Central Asia & East Europe Relations Jun 30 2021 A detailed examination of the hugely significant relationship between China and the nations of Central Asian and Eastern Europe (including Russia) from a Chinese perspective. Written by leading academics and

researchers from CASS, the Chief Editor is the influential Wu Enyuan, Director of the Institute of Russian, Eastern European, Central Asian Studies, Chinese Academy of Social Sciences. The expert coverage and analysis enables the reader to fully understand China's relations and policies towards these vital partners and neighbours.

The Fukushima 2011 Disaster Mar 16 2020 On March 11, 2011, Japan experienced the largest earthquake in its history, causing massive loss of life and damage to property and infrastructure. This book discusses governmental and civilian responses to the emergency and summarizes and critically analyzes the natural events and human shortcomings responsible for the failure of the Fukushima reactors during the first year following the accident. It covers the plant's safety history, the tsunami and earthquake, and the far-reaching implications of the events on the entire nuclear reactor industry.

RMB: Towards Internationalization Jun 18 2020 RMB: Towards Internationalization takes an in-depth look at the exchange rate regime of China's currency, the RMB, including the arrangements, related policies and management, and corresponding policy recommendations. This is the first book to apply the theories of fictitious economy, complexity science and the principles of international finance to analyze the RMB exchange rate regime. For readers interested in China's economy in general and RMB internationalization in particular, this book provides an entirely new analytical framework on the history and evolution of RMB exchange regime and on its future development. Contents: RMB Internationalization is an Irreversible Trend Exchange Rates under the Perspective of Fictitious Economy The Choice of Exchange Rate Arrangement — Empirical Analysis The Choice of Exchange Rate Arrangement — Case Study Evolution of the RMB Exchange Rate Regime The Determination of a Central Rate for the RMB The Opening Up of Capital Account Path to RMB Internationalization Readership: Researchers, economists, finance professionals, analysts, individual investors, monetary and banking authorities in Asia and those who are interested in China's exchange rate regimes and the future of its currency, the RMB. Keywords: RMB; Currency; Exchange Rate; Exchange Rate Regime; China; Capital Account Liberalization; Financial Crisis; Complexity Theory; Fictitious Economy

Consumer Western Europe 2006/2007 Oct 11 2019 Helps you understand consumer markets

in Western Europe. This statistical handbook presents market size data for over 330 products in 17 European countries over a six year time period (2000-2006).
