Colin Gunton was a world renowned scholar, systematic theologian and Reformed Church minister. *Revelation and Reason* is an in-depth analysis, derived from the annual lecture/seminar course he gave to MA students at King's College London. Approximately one-third of the work is a direct transcript, and analysis of the three two-hour lectures Colin Gunton gave at a break-neck speed: 1. 'From Reason and Revelation to Revelation And Reason'; 2. 'The Modern Problem in an Historical Context'; 3. 'Aspects of Karl Barth on Faith And Reason'. These lectures were a history, analysis and critique of *Revelation and Reason* in Systematic Theology and Philosophy, culminating with Karl Barth. The remainder is a transcript of the unrehearsed, unscripted, extemporary responses Colin Gunton gave to MA student's papers on set topics in the *Revelation and Reason* course, seamlessly integrated, where relevant, with detail from the main three lectures. Colin was a creative lecturer and widely read theologian and philosopher. These extemporary responses show the breadth of his learning, and his genius spontaneously to bring to mind relevant ideas from a wealth of theologians and philosophers, whilst incisively and piercingly exposing the flaws as well as the strengths under consideration. From this wealth of reading, Colin gave space to the free rein of his mind particularly when fielding questions or trying to analyze a particular strand of a theologian's thought. *Revelation and Reason* is a complementary volume to Colin Gunton's posthumously published *The Barth Lectures* (Continuum 2007) and to the first volume of his unfinished *Systematic Theology*, also forthcoming from T&T Clark. 4 Complete Books in One Volume! This book provides a detailed analysis of mutual fund regulations and governance in the UK from the investor protection perspective. It comprehensively describes mutual funds by their function, social utility, and legal attributes, examining the level of protection provided to retail investors under existing regulations. Mutual funds are externally managed with fund ownership separated out from their management, which carries a potential conflict of interest between the self-interests of the fund management and each fund's investors. The book provides an in-depth analysis of this agency problem in the mutual fund industry, comparing the competing governance models in the UK and the US and the supervision of management activities. In the UK, it investigates the main governance mechanisms, including disclosure, the effectiveness of voting rights, and the role of the Financial Conduct Authority in protecting investors. It also considers the role of prudential regulations in protecting mutual fund investors, with a particular focus on risk management and mutual fund liquidity crisis. The book further investigates the impact of the withdrawal of the UK from the European Union (Brexit) on the industry and what this means for the future of the undertakings for collective investment in transferable securities (UCITS) in the UK. The concept of mutual funds is still not clearly understood, so this book will clearly define the different legal and practical aspects of mutual funds. It will be the first substantial study of mutual fund governance mechanisms under the existing mutual fund laws and regulations in the UK.
