LUBRICATION ORDER - HOWITZER, LIGHT, TOWED: 105MM, M101 AND M101A1 (5 pages) How should I live? What is my purpose? Can I find happiness? Ever felt as though life would be simpler if it came with an instruction manual? There are no easy answers to the big questions. And life does not follow a straight path from A to B. Since the beginning of time, people have asked questions about how they should live and, from Ancient Greece to Japan, philosophers have attempted to solve these questions for us. The timeless wisdom that they offer can help us to find our own path. In this insightful, engaging book, renowned existential psychotherapist and philosophical counsellor Antonia Macaro and bestselling philosopher Julian Baggini cover topics such as bereavement, luck, free will and relationships, and guide us through what the greatest thinkers to ever walk the earth have to say on these subjects, from the Stoics to Sartre. Discover advice from the world's greatest thinkers on questions like: Is there a right way to grieve? What is free will? How can we learn from past mistakes? Do we make our own luck? In the field, seconds count. PHTLS: Prehospital Trauma Life Support for First Responders, Second Edition teaches and reinforces the principles of rapidly assessing a trauma patient using an orderly approach, immediately treating life-threatening problems as they are identified, and minimizing any delays in initiating transport to an appropriate destination. Developed by the National Association of Emergency Medical Technicians (NAEMT) in cooperation with the American College of Surgeons Committee on Trauma (ASC-COT), PHTLS for First Responders, Second Edition reflects current, evidence-based knowledge and practice, and promotes critical-thinking as the foundation for providing quality care. Rapidly assessing a trauma patient to identify life-saving care is at the heart of PHTLS for First Responders, Second Edition. It takes 2 minutes or less for a patient to exsanguinate. No other intervention first responders perform is more important than stopping that level of bleeding in trauma patients. To reflect this, PHTLS for First Responders, Second Edition utilizes the XABCDE patient assessment mnemonic to place exsanguinating hemorrhage at the forefront of every patient encounter. The importance of XABCDE (eXsanguinating hemorrhage, airway, breathing, circulation, disability, and expose/environment) is reinforced in every clinical chapter. PHTLS for First Responders, Second Edition features a new course manual, which reinforces and clarifies key concepts from the course; features an engaging, interactive design; and is written so you feel like you are participating in a conversation, versus listening to a lecture.
