FIELD & STREAM, America's largest outdoor sports magazine, celebrates the outdoor experience with great stories, compelling photography, and sound advice while honoring the traditions hunters and fishermen have passed down for generations. From dirt bikes and jet skis to weed wackers and snowblowers, machines powered by small gas engines have become a permanent - and loud - fixture in American culture. But fifty years of high-speed fun and pristine lawns have not come without cost. technology it powers, Paul R. Josephson explores the political, environmental, and public health issues surrounding one of America's most dangerous pastimes. Each chapter tells the story of an ecosystem within the United States and the devices that wreak havoc on it - personal watercraft (PWCs) on inland lakes and rivers; all-terrain vehicles (ATVs) in deserts and forests; lawn mowers and leaf blowers in suburbia. In addition to environmental impacts, Josephson discusses the development and promotion of these technologies, the legal and regulatory efforts made to improve their safety and environmental soundness, and the role of owners' clubs in encouraging responsible operation. research, nongovernmental organizations, and manufacturers, Josephson's compelling history leads to one irrefutable conclusion: these machines cannot be operated without loss of life and loss of habitat. Maintaining the health and safety of workers in the United States and globally is accomplished in part by reducing hazardous exposures through the use of personal protective equipment. Personal protective technologies (PPT) include respirators worn by construction workers and miners; protective clothing, respirators, and gloves worn by firefighters and mine rescue workers; and respirators and protective clothing worn by healthcare workers. An estimated 5 million workers are required to wear respirators in 1.3 million U.S. workplaces. For some occupations, such as firefighting, the worker's protective equipment is the only form of protection against life-threatening hazards; for other workers, the PPT is a supplement to ventilation and other environmental, engineering, or administrative hazard controls. In the United States, federal responsibility for civilian worker PPT is integral to the mission of the National Institute for Occupational Safety and Health (NIOSH). This book examines the NIOSH Personal Protective Technology Program (PPT Program) and specifically focuses on the relevance and impact of this program in reducing hazardous exposures and improving worker health and safety. De Tachtigjarige Oorlog maakte dat mensen in grote groepen van Zuid- naar Noord-Nederland trokken. De bevolking van de Noord-Nederlandse steden groeide explosief, het aantal schilders verveelvoudigde zich en de productie moet enorm zijn geweest. Kunnen we tot een beter begrip van de stormachtige ontwikkeling van de schilderkunst komen? Het beroep was gebonden aan de regels van het gilde, de leerling werd in het vak opgeleid en er moesten beroepsgeheimen hebben gegolden. Toch is er hier en daar over geschreven. Er worden aspecten genoemd, zoals het bedenken van een voorstelling, het tekenen van de vormen, de plaatsing in het vlak, het kleurgebruik. Een vast omlijnde theorie van de schilderkunst is er tot in de achttiende eeuw niet van gekomen. We moeten het doen met gegevens uit verspreide geschriften en toevallige publicaties. Hessel Miedema heeft deze bij elkaar gebracht".
