Experiencing a major crisis from different viewpoints, step by step The Suez crisis of 1956—now little more than dim history for many people—offers a master class in statecraft. It was a potentially explosive Middle East confrontation capped by a surprise move that reshaped the region for

years to come. It was a diplomatic crisis that riveted the world's attention. And it was a short but startling war that ended in unexpected ways for every country involved. Six countries, including two superpowers, had major roles, but each saw the situation differently. From one stage to the next, it could be hard to tell which state was really driving the action. As in any good ensemble, all the actors had pivotal parts to play. Like an illustration that uses an exploded view of an object to show how it works, this book uses an unprecedented design to deconstruct the Suez crisis. The story is broken down into three distinct phases. In each phase, the reader sees the issues as they were perceived by each country involved, taking into account different types of information and diverse characteristics of each leader and that leader's unique perspectives. Then, after each phase has been laid out, editorial observations invite the reader to consider the interplay. Developed by an unusual group of veteran policy practitioners and historians working as a team, Suez Deconstructed is not just a fresh way to understand the history of a major world crisis. Whether one's primary interest is statecraft or history, this study provides a fascinating step-by-step experience, repeatedly shifting from one viewpoint to another. At each stage, readers can gain rare experience in the way these very human leaders sized up their situations, defined and redefined their problems, improvised diplomatic or military solutions, sought ways to influence each other, and tried to change the course of history. An annotated survey of articles and technical papers appearing in the engineering, scientific and industrial journals and books here and abroad. When the Supreme Court overturned Louisville's local desegregation plan in 2007, the people of Jefferson County, Kentucky, faced the question of whether and how to maintain racial diversity in their schools. This debate came at a time when scholars, pundits, and much of the public had declared school integration a failed experiment rightfully abandoned. Using oral history narratives, newspaper accounts, and other documents, Tracy E. K'Meyer exposes the disappointments of desegregation, draws attention to those who struggled for over five decades to bring about equality and diversity, and highlights the many benefits of school integration. K'Meyer chronicles the local response to Brown v. Board of Education in 1956 and describes the start of countywide busing in 1975 as well as the crisis sparked by violent opposition to it. She reveals the forgotten story of the defense of integration and busing reforms in the 1980s and 1990s, culminating in the response to the 2007 Supreme Court decision known as Meredith. This long and multifaceted struggle for school desegregation, K'Meyer shows, informs the ongoing movement for social justice in Louisville and beyond.
