This book is dedicated to the Axis solders of World War 2. Though maligned by the victor's history - it was due only to the immense courage, bravery and sacrifices of German, Italian and other Axis forces that Soviet troops did not succeed in raising the Red flag over Paris, Amsterdam, Copenhagen, Rome, Stockholm, and, perhaps, London." The book "Fascism & Dharma" shows the synthesis of two ideologies from vastly different cultures that have so much in common. Fascism and Dharma shatters the illusions of Fascism perpetrated on the world for so long and exposes World War 2's other histories seldom reported. The Edicts of Emperor Ashoka which set the moral code of a vast Empire are central to the concept of Dharma. It is the duty of the citizen to honor a code of morality for himself and the state. The Fascist conception of life is an ideology, in which man is viewed in his immanent relation to a higher law..."Those who perceive nothing beyond opportunistic considerations fail to realize that Fascism is not only a system of government but, also and above all, a system of thought." The "higher law" is Dharma. The eternal law is Dharma and the negation of "opportunistic considerations" are part of the eight fold path and includes honor, duty and the moral code of your society. "THE IMPORTANCE OF TRADITION In the Fascist conception of history, man is man only by virtue of the spiritual process to which he contributes as a member of the family, the social group, the nation, and in function of history to which all nations bring their contribution. Hence it is the great value of tradition in records, in language, in customs, in the rules of social life that make great men and great nations A written history

is important to remember past mistakes and reveal the truth. "Those who forget the past are doomed to repeat it" The Fascist State, as a higher and more powerful expression of personality, is not only a force, but a spiritual one. It sums up all the manifestations of the moral and intellectual life of man. Its functions cannot be limited to those enforcing order and keeping the peace, as the liberal doctrine had it. It is no mere mechanical device for defining the sphere within which the individual may duly exercise his supposed rights. It is the Wheel of law (Dharma chakra). It is the eternal law of morality, duty, honor and righteousness. "Fascism, in short, is not only a law-giver and a founder of institutions, but an educator and a promoter of spiritual life. It aims at refashioning not only the forms of life but their content - man, his character, and his faith. To achieve this purpose it enforces discipline and uses authority, entering into the soul and ruling with undisputed sway. Therefore it has chosen as its emblem the bundled Lictor's rods, the symbol of unity, strength, and justice." The emblem of the "Lictor's rods of Fascism is the same as the Dharma chakra or the emblem of the wheel of law of Buddhism. The honor of the individual is the honor of the nation. It is what right you can do for yourself, what right you can do for the nation, what right nation is obliged to herself, and what right the nation can do for you. Mr. Columbus Falco is an Italian American born in New Orleans, Louisiana, and grew up mostly in the southern state of Louisiana. A strong advocate of the US Constitution and the right for self-determination which is expressed in *The Crucible of Decline*. Mr. Falco served in the military with high distinction. Grandson to an Italian Gentleman who was closely involved in Mussolini's rise to power. He has traveled, and lived extensively through America, Europe, and Asia. He consulted with Ministers in India and Sri Lanka has given him the in depth knowledge that led to the production of books such as "India Shattering the Illusion. The Birth of New Nations. Kashmir to Elam" to "European Union. The Rape of Europa." Reprint of the original, first published in 1871. **THE WHEEL OF REBIRTH:** This book goes to the heart of the esoteric basis of reincarnation to reveal the truth of this ancient belief. Dr. Baker elucidates the principles of rebirth and provides convincing arguments for having a positive understanding of this timeless subject. He surveys the concepts of reincarnation found in many of the world's religions including Judaism, early Christianity, Hinduism and Buddhism. Truth is within ourselves; it takes no rise From outward things, whate 'er you may believe. There is an inmost centre in us all, Where truth abides in fullness; and around, Wall upon wall, the gross flesh hems it in, This perfect, clear perception—which is truth. —From *Paracelsus* by Robert Browning Originally published in 1972, this anthology examines death through the eyes of great Buddhist, Taoist, Hindu and Western masters. Instructions and specific rites are set forth to enable people to guide the mind of the dying through death and the Intermediate stage which follows. The sections of Rebirth and Karma deal succinctly with these complex and often mis-understood doctrines. *Oxmoon*, the rambling old mansion on a sprawling estate in Wales, has been for generations, the dream, the downfall, and the destiny of the wealthy Godwin family. Discover how these extraordinary people were caught on life's wheel of fortune, how the family legacy of madness, murder, and doomed romance, begun with 19th century Gwyneth Godwin's scandalous affair with sheep farmer Owen Bryn-Davis, pursue all of the Godwins who live and die for the memories and the beauty of *Oxmoon*. Among the most significant legal developments of our time is the emergence of a European private law. The European Union enacts directives which profoundly affect the practice, teaching and study of core areas of classical private law. Internationally commissions have formulated principles of European trusts, contract and commercial law. Furthermore, uniform private law can be found in a number of international conventions. "India's social structure is so entwined with religion, Jacobsohn emphasizes, that meaningful social reform presupposes state intervention in the spiritual domain. Hence India's "ameliorative" model of secular constitutionalism, designed to ameliorate the disabling effects of the caste system and other religiously based practices. Jacobsohn contrasts this with the "visionary" secularism of Israel, where the state identifies itself with a particular religion, and with America's "assimilative" secularism."--**BOOK JACKET.** On rails-to-trails bike paths, city streets, and winding country roads, the bicycle seems ubiquitous in the Badger State. Yet there's a complex and fascinating history behind the popularity of biking in Wisconsin—one that until now has never been told. Meticulously researched through periodicals and newspapers, *Wheel Fever* traces the story of Wisconsin's first "bicycling boom," from the velocipede craze of 1869 through the "wheel fever" of the 1890s. It was during this crucial period that the sport Wisconsinites know and adore first took shape. From the start it has been defined by a rich and often impassioned debate over who should be allowed to ride, where they could ride, and even what they could wear. Many early riders embraced the bicycle as a solution to the age-old problem of how to get from here to there in the quickest and easiest way possible. Yet for every supporter of the "poor man's horse," there were others who wanted to keep the rights and privileges of riding to an elite set. Women, the working class, and people of color were often left behind as middle- and upper-class white men benefitted from the "masculine" sport and all-male clubs and racing events began to shape the scene. Even as bikes became more affordable and accessible, a culture defined by inequality helped create bicycling in its own image, and these limitations continue to haunt the sport today. *Wheel Fever* is about the origins of bicycling in Wisconsin and why those origins still matter, but it is also about our continuing fascination with all things bicycle. From "boneshakers" to high-wheels, standard models to racing bikes, tandems to tricycles, the book is lushly illustrated with never-before-seen images of early cycling, and the people who rode them: bloomer girls, bicycle jockeys, young urbanites, and unionized workers. Laying the foundations for a much-beloved recreation, *Wheel Fever* challenges us to imagine anew the democratic possibilities that animated cycling's early debates. What is the law of karma? Science believes that an animal and a human are the result of the biological evolution theory developed by Charles Darwin. Buddhism believes that the animal and human are the result of reincarnation. In fact, the animals and humans are the result of evolution and reincarnation. In other words, living beings are the result of biological and psychological development, because both the animal and human consist of body and mind. A soul appeared when the sentient beings emerged in the universe and with this information about the actions-karma taken during their life. This information persists in the soul. Even if the karma does not grow in this life, either happiness or suffering, after the death of the animal and human the soul with karma doesn't die or fade away. It is reborn in one of the 6 animal species of the

non-eternal universe depending on their karma, and still exists in the universe from one birth to another birth. If people develop their minds and healthy actions, they may arise in rebirth and even reborn as the Buddha or God. If people have an unhealthy mind, the actions that they take can reduce their rebirth and even be reborn as hell, as a devil. Buddhist teachings describe it as the law of karma. Karma is the seed of mental, physical and verbal actions. Generally speaking, karma covers all the information about the actions committed by the living creatures, in their past and present lifetime. Until now, not only ordinary people but even scientists have not believed and accepted the law of karma. This is the main reason some people say that the Buddhist religion makes people stupid and some religions say that the Buddhist religion is misleading people. This is due to lack of scientific evidence for the law of karma. We have proved and verified the existence of the law of karma in this book with the help of Set theory and quantum physics. The book contains 3 parts and 15 chapters. In the first part, we have proved and verified the law of karma by using Set theory, while the following two conditions: first, the existence of three types of things in a non-eternal universe: matter / body, spirit / mind and imperfect cluster elements (body-mind), second, the occurrence of separation of mind and body when people and animals die. In the second part, we proved and verified the first condition and the soul with karma continues to exist in Samsara as the Wheel of Dharma or exists as the law of motion of animated matter-soul. And we demonstrate that the Buddhist philosophy has a dualist and dialectic character. In the Part 3, we proved and verified the second condition that the body and mind of humans and animals are separated, when they die by using Quantum physics, and it has an empirical testament and its own unique interpretation. Also, we demonstrate that the life is rational combination of evolution and reincarnation. The Buddhist philosophy assumes that there are non-eternal and eternal universes and they have their own objects and phenomena. We demonstrate that there are non-eternal, eternal and neutral universe and describe their facts and phenomena. At the end, we demonstrate the Buddhist teachings about how to reduce the suffering and improve the happiness and rebirth and enlightenment as well as three levels. The Buddha Gautama found the natural law of karma or the origin, development, degradation and death of living creatures through enlightenment over 2,500 years ago. But people have studied it as a religious doctrine in this period due to the lack of scientific evidence. At this time, we have proved the law, therefore, our duty is to extend this knowledge to people regardless of their religion. Learning about the law of karma is not only useful for personal development, but also vital to improve the ethics and morality of human social development. Explains the concept of the medicine wheel, and shows how to use it in practical exercises and ceremonies to gain energy from the spirits. Excerpt from The Wheel of the Law: Buddhism, Illustrated From Siamese Sources by the Modern Buddhist, a Life of Buddha, and an Account of the Phrabat Modern Buddhist, the short essay in which I, last year, introduced to European readers a summary of the ideas of an eminent Siamese nobleman on his own and other religions. The Buddhism it teaches, though it has a strong party in favour of it, rejects many superstitions, and so differs from the Buddhism of the generality of educated Siamese, which is illustrated by the second and third parts. All Buddhists, throughout the wide range of countries where the doctrines of Buddha prevail, call their religion the doctrine of " The Wheel of the Law." I have adopted the name for this book, because it is peculiarly appropriate to a theory of Buddhism, which the book in some degree illustrates. I refer to the theory that all existence of which we have any conception is but a part of an endless chain, or circle, of causes and effects ; that so long as we remain in that wheel there is no rest and no peace ; and that rest can only be obtained by escaping from that wheel into the incomprehensible Nirvana. Buddha taught a religion of which the wheel was the only proper symbol ; for his theory, professing to be complete, dealt with but a limited round of knowledge ; ignored the beginning, and was equally vague as to the end. He neither taught of a God, the Creator of existence, nor of a heaven, the absorber of existence, but restrained his teaching within what he believed to be the limits of reason.
