Risk Management in Sport and Recreation is a comprehensive resource for those charged with the responsibility of providing for the

safety of participants and spectators in a sport or recreation setting. It covers a range of safety issues, including lightning, heat illness, aquatics, playground safety, drug testing, and medical emergency action plans. Readers receive clear and detailed explanations of issues to consider before making decisions on risk management. Risk Management in Sport and Recreation is designed to provide a foundation for approaching key issues in safety and risk management. It shows readers how to evaluate and analyze various safety issues and apply the underlying

concepts to a variety of situations. The following are unique features of the text: -A safety guidelines finder lists Web sites of accessible standards, guidelines, and recommendations from leading organizations. - Chapter objectives and pullout boxes of key points and key statistics stress the importance of the topic under discussion. - Threshold issues in each chapter highlight important factors to consider when making decisions on risk management. -Real-world applications at the end of each chapter present scenarios involving the potential for harm, and readers

must make a decision on how to address the issues. - Examples of public service announcements, posters, and other publicly viewed safety information are presented. -An appendix offers examples of emergency action plans, checklists, and recommendations from organizations such as the National Lightning Safety Institute and university aquatic centers. -A companion Web site provides links to the Web sites used in the book, as well as updates to guidelines and links that may occur after the book is in print. The safety guidelines finder gives students and practitioners a

single location from which they can easily access important safety information. Organized under land-based or water-based activities, each activity lists guidelines, recommendations, and standards along with the source for that information. Each entry includes Web sites where readers can find the full documents. The text also features sample guidelines and safety checklists from agencies and associations that demonstrate how organizations might plan for risk and communicate safety information. Readers also consider the types of postings and

equipment they will need in order to communicate their risk management plans, and they are given real-life situations in which a risk management plan is needed and are prompted to consider why and how to create a plan for such situations. The resource will help students and professionals plan for and manage risk. Current and future employees of sport facilities, school athletic programs, parks and recreation programs, youth and aquatic centers, or resorts and golf courses will find that Risk Management in Sport and Recreation provides the tools to assist in making the right

decisions to manage risk effectively. Multi-activity guidebook to the Haute Maurienne region of south east France. The book describes a wide range of the finest day walks, scrambles, rock climbs, via ferratas, treks and mountain biking and road cycling routes, offering all the inspiration needed for a multi-activity or family holiday. The Maurienne valley is served by good transport links, Modane serves as the gateway to the upper valley with links from Paris and Turin served by the TGV. Lanslebourg is the largest village after Modane and offers plenty of choice of

accommodation, and Termignon is a reasonably central base for exploring the Haute Maurienne. Routes vary from pretty Alpine lake rambles to mammoth mountain bike routes and include the normal route to the summit of Dent Parrachee, the Matterhorn of the valley that can be reached without crossing a glacier, and arranged by difficulty. Information about facilities and grades for each activity are carefully explained and routes are illustrated with sketch maps, topos and profiles and inspiring photographs. The Vanoise massif is a beautiful range of mountains bounded by the valleys of the

Maurienne and the Tarentaise. Sitting on the French-Italian border, the Upper Maurienne (Haute Maurienne) has a southern boundary bordering the Italian region of Piedmont. Its northern border is less pronounced, as the massif of the Vanoise blurs the boundary with the Tarentaise valley.
